

## Premium Thermal Transfer Ribbons for All Applications

RACO Barcode is a leader in thermal transfer ribbons, offering a comprehensive line of wax, wax/resin, and resin ribbons for a wide range of printers. This includes near edge printers and printer/applifiers to meet a broad range of labeling applications. Our quality ribbons are formulated to ensure high density bar codes, text and graphics. We have over 2,000 items available – 200 in stock for same day shipping. However, for items not considered stock, if you need the order to get out same day we'll get it done for you! We also manufacture a full line of high quality labels. Let us be your one source for both labels and thermal ribbons to ensure print quality and to keep your operation running smoothly. Why risk working with multiple vendors with mixed results? The solution for worry free printing is simple – rely on RACO Barcode for all your supplies needs.

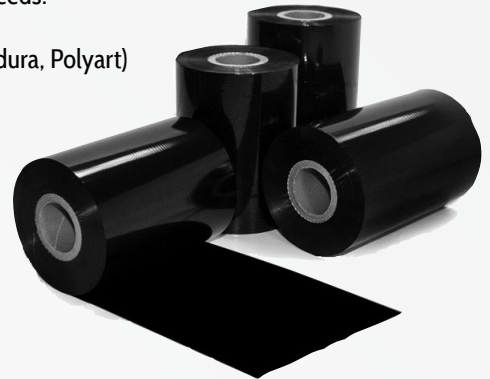

## Wax Ribbons

A complete line of wax ribbons is available for all of your general purpose applications. We offer several wax-based ink formulas which provide high-quality printing at an economical price. Developed, designed and produced to printer manufacturers' strict specifications, these ribbons offer excellent print quality for normal and rotated bar codes and small characters. RACO offer several lines of wax ribbons: one designed to handle basic general purpose applications; one with lower printhead energy and excellent durability for more demanding applications; and one with a high performance backcoat for high volume applications to extend printhead life. These ribbons can also print at speeds as high as 12 IPS. You can count on our full line of wax ribbons for the best solution to all of your general purpose printing needs.

Recommended Media: Coated and Uncoated Paper Tag & Label Stocks. Synthetic Papers (i.e. Kimdura, Polyart)

### APPLICATIONS:

- General purpose labeling
- Retail tag and label applications
- Shipping, addressing, warehousing and receiving labeling
- Shelf/bin labeling
- Compliance labeling
- Textile and apparel applications

## Wax/Resin Ribbons

Designed for today's high-speed printers, our wax/resin ribbons provide an very high level of smudge and scratch resistance, while printing at speeds as high as 12 IPS. The level of print quality is exceptional, especially for complex label formats – normal and rotated bar codes, logos and graphics. Our wax/resin ribbons are also ideal for two dimensional codes. RACO wax/resin ribbons offer good resistance to IPA and household cleaners as well as moderate steam resistance. With our full line of wax/resin ribbons, we're sure to have the ribbons for your applications and label materials.

Recommended Media: Coated Paper Tag and Label Stocks, Polyethylene, and Polypropylene Films and Polyester.

### APPLICATIONS:

- Shipping, addressing, warehousing and receiving labeling
- Shelf/bin labeling
- Pharmaceutical
- Textile and apparel applications
- Nursery and lumber applications
- Printing directly on flexible packaging films

## Resin Ribbons

RACO's line of premium resin ribbons are designed for maximum durability in the demanding environments of industrial applications. With a high level of resistance to an array of chemicals to which thermal transfer printing may be exposed in harsh industrial environments, along with potentially high levels of heat, these resin-based ribbons are sure to stand up to the test. Our premium ribbons have outstanding print quality for normal and rotated bar codes, and are able to withstand the effects of steam presses. In addition to their high levels of performance in demanding environments, they operate at lower printhead energy settings, allowing you to extend printhead life and reduce maintenance. Due to their ability to perform in harsh environments, our premium ribbons are UL-recognized on a variety of label stocks.

Recommended Media: Polyethylene, Polypropylene, Nylon Top Coated and Print Treated Polyester, Vinyl and Polyamide Films

### APPLICATIONS:

- Outdoor applications
- Textile and apparel applications
- Automotive
- Chemical drum labeling
- Medical and pharmaceutical labeling
- Industrial applications
- Automotive applications
- Printing directly on flexible packaging films

## Near-Edge Ribbons

Designed for today's high-speed printers, our wax/resin ribbons provide an very high level of smudge and scratch resistance, while printing at speeds as high as 12 IPS. The level of print quality is exceptional, especially for complex label formats - normal and rotated bar codes, logos and graphics. Our wax/resin ribbons are also ideal for two dimensional codes. RACO wax/resin ribbons offer good resistance to IPA and household cleaners as well as moderate steam resistance. With our full line of wax/resin ribbons, we're sure to have the ribbons for your applications and label materials.

Recommended Media: Coated Paper Tag and Label Stocks, Polyethylene, and Polypropylene Films and Polyester.
