

RACO CONTAINER MANAGEMENT TRACKS CONTAINERS TO SPECIFIC LOCATION & TIME

Keep track of your roll-off containers on a up-to-date platform that allows you to throw out your spiral notebook, ditch your whiteboards, and leave your Excel sheets in the dust. Pinpoint your roll-off boxes, dumpsters, and other assets to a specific location on a digital map displayed on your PC or mobile device.

“Last Known Address” is no longer an acceptable status update for your containers, your drivers or your customers.

FEATURES

-  Google Maps Integration
-  Groupings
-  Detailed Reporting
-  Mobile Management
-  All Your Containers on One Map

*The RACO Container Management can be complimented with our GPS Tracking solution for the vehicles and assets utilizing the same GPS Tracking platform.

RFID TRACKING ALSO AN OPTION

Adding Radio Frequency Identification (RFID) to this solution makes it quicker and easier for your workers. They don't even have to leave the truck to read the container.
